

4th Grade Food Truck Project

Ms. Belzunce's Grade 4 students created detailed paper food trucks during their last week of school. Each student designed their own food trucks (including menus), from concept to creation using math, creativity and ingenuity. Inside each food truck students drew entire kitchens that best supported their cuisine. Popular food truck concepts included tacos, Korean, ice cream, pizza and sushi. They were then proudly displayed in the classroom modeled as a food truck festival.
